DETAILED ACTION

Specification

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a).
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

"Microfiche Appendices" were accepted by the Office until March 1, 2001.)

- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/665,268 Page 3

Art Unit: 3763

1. Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Calabrese (USPN 4,335,718). Calabrese disclosed a needle cannula with a lumen having the same uniform inside diameter through said needle cannula and where the outside sidewalls tapered towards the skin and wherein there are two portions of the needle cannula with a proximal end and a distal end in a relationship with a peripheral transition zone, and where the proximal end has the same uniform outside diameter, (Figure 3 and entire reference).

- 2. Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kramer et al. (USPN 5,868,711). Kramer et al. disclosed a needle cannula with a lumen having the same uniform inside diameter through said needle cannula and where the outside sidewalls tapered towards the skin and wherein there are two portions of the needle cannula with a proximal end and a distal end in relationship with a peripheral transition zone, and where the proximal end has the same uniform outside diameter, (Figure 11 and entire reference).
- 3. Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Barnhart (UPSN 2,187,259).

Barnhart discloses a needle cannula with a lumen having the same uniform inside diameter through said needle cannula and where the outside sidewalls tapered towards the skin and wherein there are two portions of the needle cannula with a proximal end and a distal end in relationship with a peripheral transition zone, and where the proximal end has the same uniform outside diameter, (Figure 13, and entire reference).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Calabrese.

Calabrese disclosed the claimed invention, but fails to give the specific size and dimensions for the needle's diameter.

Therefore, at the time of the invention, it would have been obvious to construct the device from the claimed dimensions since the Federal Circuit has held, where the only difference between the prior art and the claims was a recitation of relative dimension/size/proportion of the claimed device and a device having the claimed relative dimensions would not perform differently that the prior art device, the claimed device was not patentably distinct from the prior art device.

6. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kramer et al.

Kramer et al. disclosed the claimed invention except for the size and the dimensions of the outer and inner diameters of the needle.

Therefore, at the time of the invention, it would have been obvious to construct the device from the claimed dimensions since the Federal Circuit has held, where the only difference between the prior art and the claims was a recitation of relative

Art Unit: 3763

dimension/size/proportion of the claimed device and a device having the claimed relative dimensions would not perform differently that the prior art device, the claimed device was not patentably distinct from the prior art device.

7. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barnhart.

Barnhart disclosed the claimed invention except for the size and the dimensions of the outer and inner diameters of the needle.

Therefore, at the time of the invention, it would have been obvious to construct the device from the claimed dimensions since the Federal Circuit has held, where the only difference between the prior art and the claims was a recitation of relative dimension/size/proportion of the claimed device and a device having the claimed relative dimensions would not perform differently that the prior art device, the claimed device was not patentably distinct from the prior art device.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew F. DeSanto whose telephone number is 571-272-4957. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick LUCCHESI can be reached on (571) 272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
